

## **8 LIST OF NOT ENCLOSED ORIGINAL COLOUR MAPS IN THE SCALE 1:10 000**

1. Geological units
2. Geomorphological units
3. Hypsometric situation
4. Angle of slope
5. Potential soil units
6. Vegetation
8. Land use units
9. Limiting factors
10. Evaluation of the air, noise and water pollution
11. Coded angle of slope
12. Coded angle of slope
13. Coded (partly) abiotic synthesis
14. Coded potential soil units
15. Coded abiotic synthesis (complexes)
16. Coded land use units
17. Coded landscape-ecological complexes
18. Functional regionalization of landscape-ecological complexes
19. Suitability of the landscape-ecological complexes for the functional elements  
(functional typification)
20. Suitability of the landscape-ecological regions (potential regionalization)
21. Primary proposition of land use
22. Secondary proposition of land use
23. Development of solid waste container service and dumping site
24. Urban land use conflicts
25. Protection and creation of the landscape
26. Potential permeability of the geological substratum
27. Classified agricultural land

### **Addresses:**

Prof. RNDr. Dr.h.c. Florin Žigrai, DrSc.  
Foreign guest professor  
Department of spatial planning  
Institute of management  
Slovak University of Technology  
Vazovova 5  
812 43 Bratislava  
e-mail: florin.zigrai@tele2.at

### **Assoc. Prof. Dr. Madhab P. Gautam**

Department of Zoology  
Tribhuvan University Kathmandu City  
Kirtipur  
Nepal
